Aircrew Professionalism information is Now Available for Use!

26 Nov 2013

The "Aircrew Professionalism" section is posted on the [CAP Pilots web page](#) to include the "Aviators Model Code of Conduct" website along with the actual Aviators Model Code of Conduct (AMCC) document. This information was developed by a team of aviation professionals, drawing upon decades of research and experience, the Code provides expectations and recommends operating practices to enhance the quality and safety of CAP flight operations. Aircrew conduct impacts the entire aviation community, including its safety culture. A code of conduct can help achieve new levels of proficiency. The AMCC is a tool, a set of guidelines which is useful to each CAP aircrew member and the overall flying community. CAP aircrew members are encouraged to use this aircrew professionalism information and to commit to the highest principles of aviation safety and professionalism.
