INDEX TO THE
COMMENTARY

Each portion of Commentary addresses a selected issue within the AVIATORS MODEL CODE OF CONDUCT (AMCC) to elaborate on its meaning and provide interpretive guidance. Commentary is provided for implementers, policy administrators, aviation association managers, and pilots who wish to explore the Code in greater depth and consider ways to adopt it. Published commentary on any provision does not imply greater importance of that provision.

Commentary is accessible via the links shown below, and within the AMCC *Web Version* <http://www.secureav.com/AMCC-v2.html>. Additional provisions will be added as the Commentary evolves.
