

MAPA AVIATOR'S CODE OF CONDUCT

This month we are proud to present to the MAPA membership the "MAPA Aviator's Code of Conduct". It offers recommendations designed to advance flight safety, airmanship, and the General Aviation community and is intended to present a vision of excellence for Mooney pilots. The MAPA Aviator's Code of Conduct is divided into seven sections each containing principles and recommended practices intended to make pilots better and safer.

The Code is presented in its entirety in this issue, and beginning in 2008 a section will be highlighted in each issue of the LOG. We encourage each MAPA member pilot to study the MAPA Aviator's Code of Conduct and find ways to incorporate its principles into each and every flight.
