

## CAPT. DONALD STEINMAN JOINS PERMANENT EDITORIAL BOARD

**November 2005**—Donald W. Steinman, ATP has joined the Permanent Editorial Board (PEB) of the *Aviators Model Code of Conduct*. Steinman is a captain at America West Airlines and has served as chairman of the America West Master Executive Council, Air Line Pilots Association (ALPA). Previously he was a pilot for Air Midwest, an instructor for Flight Safety International, a designated examiner, and a charter pilot. He has also worked as a technical writer. “Captain Steinman brings unique perspectives to the PEB – including those of special editorial skills combined with extensive experience as an airline captain and a ranking ALPA official. We are honored to include his skills, experience and participation,” said Dr. Dale DeRemer, a member of the PEB.

The PEB provides editorial oversight and stewardship of the *Aviators’ Model Code of Conduct* (AMCC), the *Student Pilots’ Model Code of Conduct*, and the *Seaplane Pilots’ Model Code of Conduct* and supporting materials (collectively, “the Codes”)—available at < [www.secureav.com](http://www.secureav.com) >. The Codes provide broad guidance for both pilots and flight students, respectively, to advance airmanship, flight safety, and the vibrancy of the aviation community.

The Codes are “living documents,” intended to be revised periodically as warranted by changing aviation practices and the aviation environment. The Codes are “organizationally neutral”—neither owned nor controlled by any particular aviation organization. This neutrality both advances their acceptability and ensures that the viewpoints of diverse organizations are considered. Indeed, such neutrality and objectivity have been essential to the success of the project and must be continually fostered to ensure their value to the broadest reaches of the General Aviation community.

Because the Codes are living documents, a formal editorial body is essential to oversee and provide balance to ongoing revisions. Therefore, the following group of insightful experts from the aviation community volunteers to serve as the PEB.
